

## An involved family helps create a successful student!

***Take that first step by becoming a member of the Rogers Elementary PTA. There's no commitment. Nothing is mandatory.***

***But your support is invaluable – to the school and to your child.***

*from Warlene Gary of the National PTA ...*

### **Parenting 101: Family Involvement Equals Student Achievement**

*As millions of students head back to the classroom this year, it's an ideal time for parents and teachers to work together so that children succeed and learning environments improve. Studies have documented that regardless of the economic, ethnic, or cultural background of the family, family involvement in a child's education is a major factor in determining success in school.*

*"No matter what the demographics, students are more likely to earn higher grades and test scores, attend school regularly, have better social skills, graduate and go on to post-secondary education when schools and families partner," said Karen Mapp, Ed.D., a leading education researcher on school, family and community partnerships and lecturer at the Harvard Graduate School on Education.*

***Family involvement is a commitment made by the parent with the help of the school and community. It is too basic and necessary of an effort to be an option.***

***It's like simple mathematics: family + involvement = student success.***
